

Symmetric Matrix From Half-Vectorization

Ivan Jacob Agaloos Pesigan

```
library(linearAlgebra)

A <- matrix(c("a", "b", "b", "c"), ncol = 2)
A
##      [,1] [,2]
## [1,] "a"  "b"
## [2,] "b"  "c"

vechA <- c("a", "b", "c")
vechsA <- "b"
diagsA <- c("a", "c")
```

Symmetric Matrix From Half-Vectorization

From Half-Vectorization

```
sym_of_vech(vechA)
##      [,1] [,2]
## [1,] "a"  "b"
## [2,] "b"  "c"
```

Symmetric Matrix From Strict Half-Vectorization

```
sym_of_vechs(vechsA, diags = diagsA)
##      [,1] [,2]
## [1,] "a"  "b"
## [2,] "b"  "c"
```
