Pattern Matrix

Ivan Jacob Agaloos Pesigan

 $M_{k}\left(d\right)$ is the $k \times k$ diagonal pattern matrix with

$$\left(\mathbf{M}_{k}\left(d\right)\right)_{ij,gh} = \begin{cases} 1 & \text{if } i=j=g=h, \\ 0 & \text{otherwise.} \end{cases}$$
 (1)

 $M_{k}\left(s\right)$ is the $k \times k$ symmetric pattern matrix with

$$(\mathbf{M}_{k}(s))_{ij,gh} = \begin{cases} 1 & \text{if } i = j = g = h, \\ \frac{1}{2} & \text{if } (i,j) = (g,h) \text{ or } (i,j) = (h,g), \\ 0 & \text{otherwise.} \end{cases}$$
 (2)

 $M_{k}\left(c\right)$ is the $k\times k$ correlation pattern matrix with

$$(\mathbf{M}_{k}(c))_{ij,gh} = \begin{cases} \frac{1}{2} & \text{if } (i,j) = (g,h) \text{ or } (i,j) = (h,g), & i \neq j, g \neq h, \\ 0 & \text{if } i = j = g = h, \\ 0 & \text{otherwise.} \end{cases}$$
